

The resource directory is a comprehensive list of skills and growing where members have offered up their assistance for the benefit of HAH Projects only. This is NOT for personal use. These members have offered to consult on projects where their expertise can be utilized by anyone working for the benefit of HAH.

The Utility Services Committee hopes to add additional skills, worksheets, tips and notes over time. If you can add to it in any way, please contact EricBoysko@yahoo.com

Just let the office know your project and what particular skills you're looking for from the sheet. They will do a keyword search or use skills provided, then will provide contact info for you to follow-up on. Since we only asked for one contact info for all the households on the recent survey, the contact info may be the other spouse. We have created a basic letter should you wish to plug in the e-mail address. The project leader may also wish to consider multiple keyword searches in order to find the best fit.

If any member wishes to be added or removed from the directory, please contact EricBoysko@yahoo.com He will update the office database. To maintain privacy, the office will share only the contact info for those skills needed. Please give your name, contact info and brief description of the project you're working on when making your request.

Since this is the first time it's been done in HAH and there was no blueprint to follow, please be patient as we know it's a work in progress. Each skill may have multiple members. The office will be responsible to share only the relevant directory contacts to the project head on an as needed basis to maintain privacy. Remember, these members offered to share their expertise with the community as a consultant or 2nd opinion. They have not asked run the project.

2021 HAH Resource Directory Skills Listing

Accountant	caregiver	Department of Natural Resources
Accountant Managerial	Caterer	Design
